

**Assignment -4**  
**Python Programming**

Assignment Date	25 October 2022
Student Name	KEERTHANA K
Student Roll Number	713619106010
Maximum Marks	2 Marks

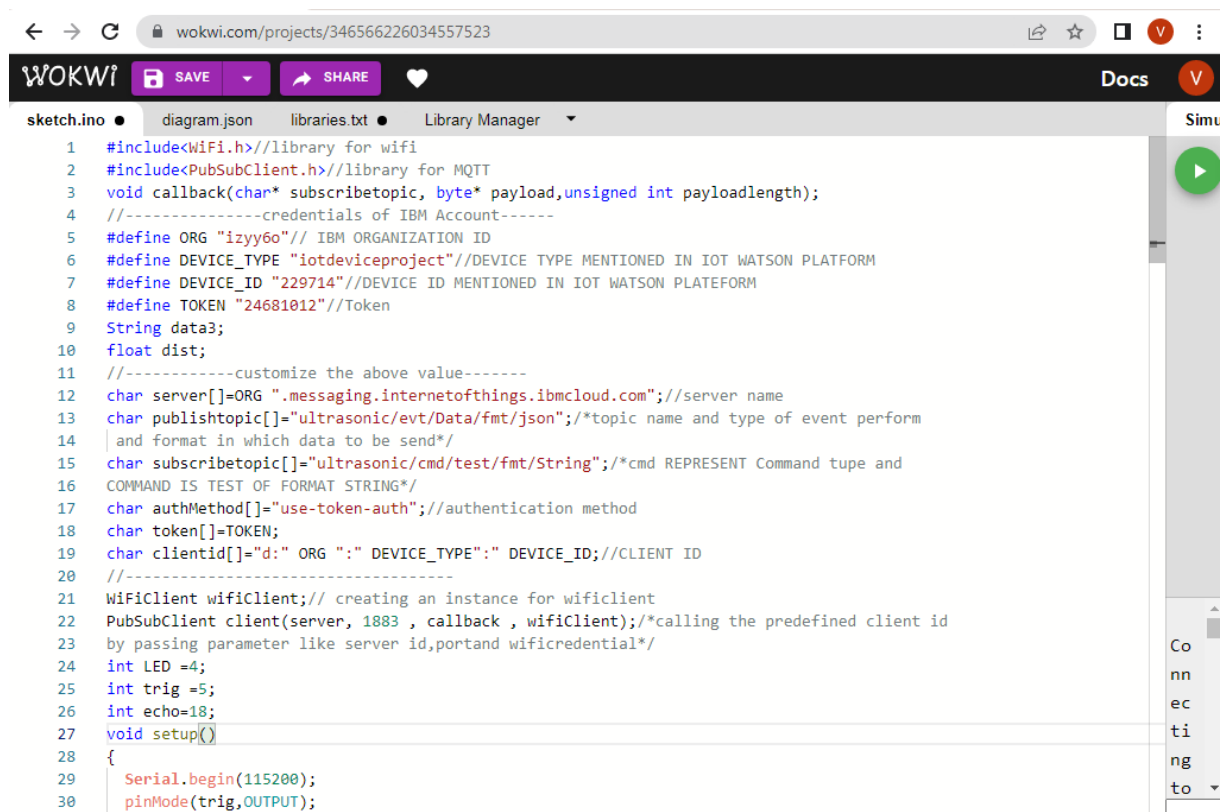

**Question-1:**

**Write code and connections in wokwi for ultrasonic sensor.**

**Whenever distance is less than 100 cms send "alert" to ibm cloud and display in device recent events.**

**Upload document with wokwi share link and images of ibm cloud**

**Solution:**

## DATA SENT TO IBM CLOUD ON NO OBJECT DETECTED

The screenshot shows the IBM Cloud IoT Platform interface. At the top, there are tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue header bar contains the device name 'DISTANCEDETECT', its status 'Disconnected', the type 'ULTRASON', and the time 'Oct 20, 2022 9:46 AM'. Below the header, there are tabs for 'Identity', 'Device Information', 'Recent Events', 'State', and 'Logs'. The 'Recent Events' tab is selected, showing a table of events. The table has columns for 'Event', 'Value', 'Format', and 'Last Received'. There are five rows of data, all showing a distance of 79.66 and the object 'Near'. The 'Last Received' column shows 'a few seconds ago' for each entry. At the bottom, there is a pagination bar showing 'Items per page: 50' and '1-2 of 2 items'.

Event	Value	Format	Last Received
Data	["distance":79.66,"object":"Near"]	json	a few seconds ago
Data	["distance":79.64,"object":"Near"]	json	a few seconds ago
Data	["distance":79.66,"object":"Near"]	json	a few seconds ago
Data	["distance":79.64,"object":"Near"]	json	a few seconds ago

## WHEN NO OBJECT DETECTED BY ULTRASONIC DETECTOR

The screenshot shows the Wokwi IDE interface. The top bar includes navigation icons, the URL 'wokwi.com/projects/346572482591851092', and buttons for 'SAVE', 'SHARE', and 'Docs'. The left sidebar shows the 'Library Manager' and the 'sketch.ino' file. The main area displays the code for the ESP32, which includes comments and code for connecting to IBM Cloud IoT Platform. The code defines the device type as 'iotdeviceproject', the device ID as '229714', and the token as '24681012'. It also defines the server, topics, and the callback function. The code is for sending data to the IBM Cloud IoT Platform. The right sidebar shows the 'Simulation' tab, which displays a visual representation of the ESP32 and the ultrasonic sensor. The simulation output shows 'no object found' and the payload {'distance':141.21,'object':'No'}.
